

SASS

Para ejecutar Sass, se debe abrir Ruby:

A screenshot of a Windows command prompt window titled "Start Command Prompt with Ruby". The window shows the Ruby version "ruby 2.4.1p111 (2017-03-22 revision 58053) [x64-mingw32]" and the current directory "C:\Users\Karin>". The rest of the window is empty, indicating it is ready for input.

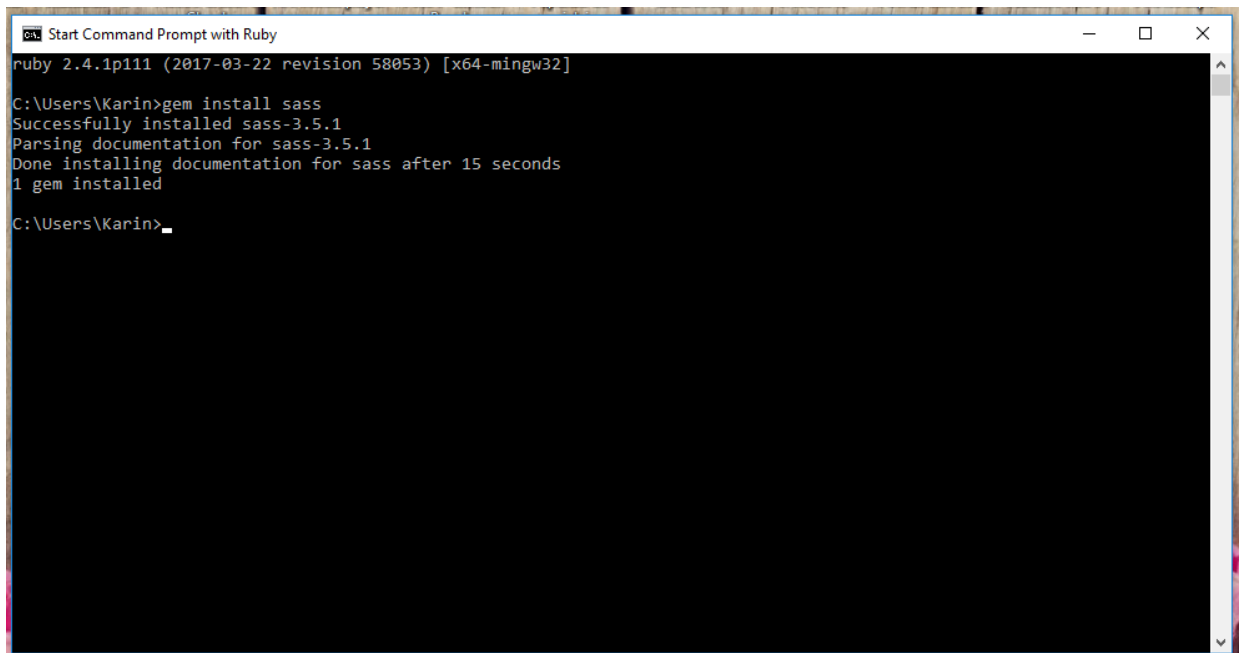

```
Start Command Prompt with Ruby
ruby 2.4.1p111 (2017-03-22 revision 58053) [x64-mingw32]
C:\Users\Karin>
```

Luego, se coloca el comando que hace referencia a instalar Sass:

A screenshot of a Windows command prompt window titled "Start Command Prompt with Ruby". The window shows the Ruby version "ruby 2.4.1p111 (2017-03-22 revision 58053) [x64-mingw32]" and the current directory "C:\Users\Karin>". The command "gem install sass_" has been entered at the prompt. The rest of the window is empty, indicating it is ready for input.

```
Start Command Prompt with Ruby
ruby 2.4.1p111 (2017-03-22 revision 58053) [x64-mingw32]
C:\Users\Karin>gem install sass_
```

Presiona Enter y espera a que cargue:

```
Start Command Prompt with Ruby
ruby 2.4.1p111 (2017-03-22 revision 58053) [x64-mingw32]
C:\Users\Karin>gem install sass
Successfully installed sass-3.5.1
Parsing documentation for sass-3.5.1
Done installing documentation for sass after 15 seconds
1 gem installed
C:\Users\Karin>
```

Y listo!
